

Orbit Track

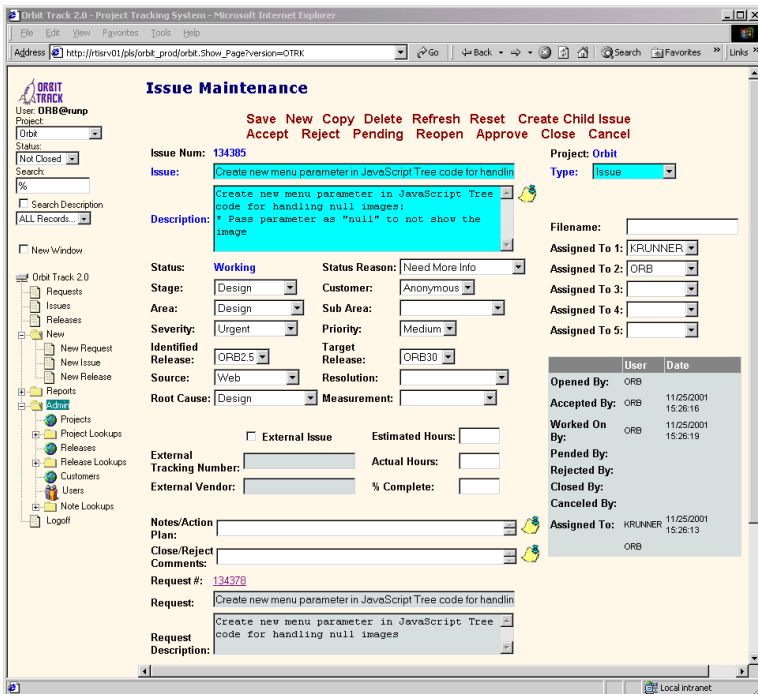

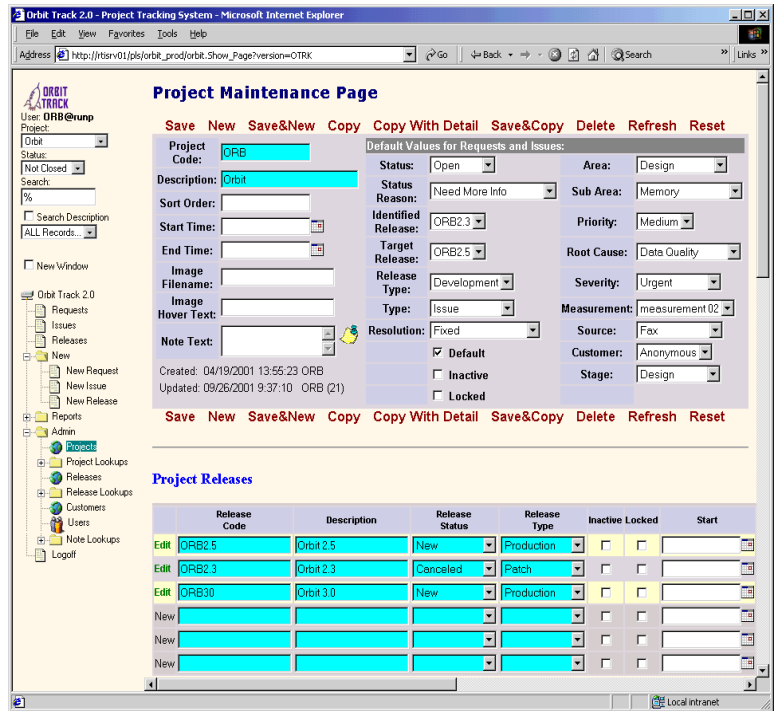

- Full Cycle Project Management
- Powerful Web Interface
- 100% Customizable

Orbit Track is a simple to use web based issue tracking system. The feature rich interface allows for easy configuration and customization. Orbit Track supports unlimited number of projects and releases, and allows team members to be assigned independently. The flexibility and ease of use allows managers, developers and testers to have direct insight into the changes being made and the issues that drive them. Route all project issues and requests to the correct person or group for faster resolution.

Benefits

- Manage Multiple Projects from a Centralized Database
